

Sustainability

Conversation sheet

Buildings

- Insulation
- Environmentally friendly refurbishment/demolition
- Reuse of rainwater in production
- High biodiversity in outdoor areas

Outdoor areas

- High biodiversity
- Minimise the impacts
- Emissions
- Climate adaptation
- Local drainage of rainwater
- Rainwater as natural value

Certification

- Environmental certification
- Environmental goals
- Branding

Communities

- Networking
- Partnerships
- Symbioses
- Co-creation

Environmental legislation

- Plan ahead

Production

- Optimisation of work processes
- Reuse processed heat
- Reuse processed water
- Use a nin-leaking compressed air system

Waste

- Mapping waste streams
- Waste sorting
- Minimise percentage of spillages
- Possibility for reuse (symbiosis)

Renewable energy

- Solar cells
- Solar heating
- Geothermal
- Windmills
- Heat pumps

Electricity

- Follow consumption
- LED lighting
- Low energy labeling
- On-off timers (lights and machines)
- Movement sensors

Heating

- Follow consumption
- Temperature reduction on the weekend
- Heat recovery
- Insulation of heating pipes
- Use direct heating system
- Heating system

Water

- Follow consumption
- Water-saving installations
- Water disposal
- Recirculation
- Recycling

Commodities & Materials

- Raw materials with environmental requirements
- Minimise materials consumption
- Reduce environmental impact
- Reduce the packaging
- Returnable materials
- Recycle raw materials

Transport

- Local solutions
- Labe for fuel consumption
- Reduce 'empty driving' maximise vehicle occupancy
- Compare fuel consumption

Chemicals

- Follow consumption
- Choose chemicals with lower environmental impact
- Cleanup the chemical storage
